

LAM VIET PHAT PHAM (KEN)

Software Engineering (Honours) Student | 20-Week Placement Candidate

Adelaide, SA | phamphat844@gmail.com | +61 434 475 790 | github.com/pham0342

Available for a 20-week full-time industry placement from July 2026

PROFESSIONAL SUMMARY

Software Engineering (Honours) student at Flinders University with practical experience developing web applications, REST APIs, relational databases and responsive user interfaces. Comfortable working across the software development lifecycle, from requirements and UI planning to implementation, testing and version control. Demonstrated experience collaborating through GitHub workflows and translating user needs into functional software. Seeking a 20-week placement where I can contribute to a development team, strengthen industry practice and deliver reliable, user-focused solutions.

TECHNICAL SKILLS

Programming	Java, JavaScript, HTML5, CSS3
Backend & APIs	Node.js, Express.js, REST APIs, CRUD operations, asynchronous integration
Databases	SQLite, relational schema design, SQL queries, data validation and reporting
Tools & Platforms	Git, GitHub, VS Code, GitHub Codespaces, Figma
Software Engineering	Responsive design, version control, requirements thinking, usability evaluation, team collaboration

PROJECT EXPERIENCE

Job Tracker API & Dashboard | *Node.js, Express.js, SQLite*

- Developed a full-stack application that tracks job applications and visualises progress from submission to outcome.
- Built REST API endpoints for create, read, update and delete operations, with input validation and structured error handling.
- Designed a relational database schema and wrote SQL queries to support pipeline analytics and reporting.
- Integrated asynchronous API requests with a dashboard interface to present application status and performance metrics.

Task Manager Web Application | *HTML, CSS, JavaScript* | [Project link](#)

- Built a browser-based task management application with Pending, In Progress and Completed workflow states.
- Implemented task creation, editing, filtering, status updates and real-time interface refreshes.
- Added start and finish timestamps, automatic duration calculation and localStorage persistence.

Anymobile Website | *HTML, CSS, JavaScript*

- Developed a responsive mobile retail website with clear product navigation and a streamlined browsing-to-enquiry journey.
- Applied mobile-first layout principles, product categorisation and iterative UI improvements across screen sizes.
- Used version control practices to manage development changes and refine the user experience.

COMP2030 Web Development Project | *Collaborative Web Application*

- Contributed to a team-developed web application using HTML and JavaScript in a shared GitHub repository.
- Used branches, commits, pull requests and code reviews to coordinate changes and maintain code quality.
- Created UI concepts in Figma and applied iterative usability evaluation during development.

Notify App Concept | *Product Notification & Supplier Workflow*

- Designed an application workflow for product tracking, supplier item management and warehouse status updates.
- Mapped customer actions to backend data requirements, including guided purchasing and supplier-source visibility.
- Explored automation opportunities for product image updates, price comparison and inventory visibility.

EDUCATION

Bachelor of Software Engineering (Honours) | Flinders University, Adelaide

Expected graduation: 2028

- Relevant areas: web development, databases, networking fundamentals, software design, requirements analysis and collaborative development.

TRAINING & CERTIFICATIONS

- Cisco Networking Academy coursework: Networking Fundamentals and Network Security.

CORE STRENGTHS

Problem-solving • Team collaboration • Clear communication • Rapid learning
Attention to detail • User-focused design • Accountability

NOTE

- Based in Adelaide, South Australia, and available for a 20-week full-time placement from September 2026.
